Get an overview of data tiering from your clusters

Cloud Tiering provides an aggregated view of data tiering from each of your on-premises clusters. This overview provides a clear picture of your environment and enables you to take proper actions.

Cloud Tiering provides the following details about your environment:

Active Clusters

The number of clusters that are currently tiering data to the cloud, the clusters that aren't tiering data to the cloud, and the number of clusters that don't support data tiering.

Data Overview

The amount of data that was tiered to the cloud, and the amount of hot and cold data on the cluster.

Total Savings

The amount of money that you've saved by tiering data to the cloud, as well as the amount of money that you could save by tiering more data to the cloud.

Policies

The number of times that each tiering policy has been applied to a volume.

Marketplace Subscriptions

The number of clusters associated with each type of Marketplace Subscription and an indication about your subscription status.

Steps

1. Click **Tiering > On-Prem Overview**.
